

Hause Machines - Engineered Solutions for Manufacturing Excellence

In this industry, experience is not a commodity, it's essential. Since 1933, Hause Machines has been serving the manufacturing industry by providing engineering solutions for manufacturing problems. Currently, we provide solutions for 900 + customers worldwide.

Our reputation is built around our high standard of quality and our ability to precisely provide for our customers' needs. Our product line has grown to include a broad range of drilling units, drilling machines, tapping units, tapping machines, fixed center multiple spindle heads, indexers, as well as a complete offering of special machines. We have the right equipment to handle most drilling, tapping, reaming, chamfering, threading, boring, facing and milling needs you may have.

If you want your production line to run smoother and faster, please contact us, and our engineering group will design and build a system to meet your production needs.
